

Image Scrapper

The screenshot displays the PyCharm IDE interface for a project named "Image Scrapper". The left sidebar shows the project structure with files: `images`, `chromedriver.exe`, `chromedriver_win32.zip`, `requirements.txt`, `scraper.py`, `External Libraries`, and `Scratches and Consoles`. The main editor window shows the `scraper.py` file with the following Python code:

```
9      wd.execute_script("window.scrollTo(0, document.body.scrollHeight);")
10      time.sleep(sleep_between_interactions)
11
12      # build the google query
13
14      search_url = "https://www.google.com/search?safe=off&site=isch&source=hp&q={q}&oq={q}&gs_l=img"
15
16      # https://www.google.com/search?safe=off&site=isch&source=hp&q=dog&oq=dog&gs_l=img
17      # load the page
18      wd.get(search_url.format(q=query))
19
20      image_urls = set()
21      image_count = 0
22      results_start = 0
23      while image_count < max_links_to_fetch:
24          scroll_to_end(wd)
25
26          # get all image thumbnail results
27          thumbnail_results = wd.find_elements_by_css_selector("img.Q4LuWd")
28          number_results = len(thumbnail_results)
29
30          fetch_image_urls()
```

The bottom panel shows the "Run" output for the `scraper` process. It indicates that 5 image links were found and saved to the `./images` directory. The output messages are:

- Found: 5 image links, done!
- SUCCESS - saved <https://encrypted-tbn0.gstatic.com/images?q=tbn:ANd9GcSfwLjPUW1M1Dr-iTXNQDoiutIvilmQ0pITLg&usqp=CAU> - as `./images\dog`
- SUCCESS - saved <https://static.toiimg.com/thumb/msid-60132235,imgsize-169468,width-800,height-600,resizemode-75/60132235.jpg> - as `./images\dog`
- SUCCESS - saved <https://hips.hearstapps.com/hmg-prod.s3.amazonaws.com/images/golden-retriever-royalty-free-image-506756303-1560962726.jpg?crop=0.672xw:1.00xh;0.00xw:0.00xh> - as `./images\dog`
